Approved For Release 2003/08/11: CIA-RDP82-00457R003700690025 1

b. The reported occupation of the airfield by about 180 fighters is unusually high. Fighter units were possibly concentrated at the airfield in connection with large-scale naneuvers. The report does not inaccate the previous location of the fighters. Some of them had possibly been stationed in BRANDENBURG-ARADO.

c. The mirfield was evacuated in mid-September 1949 by the two fighter regiments previously stationed there.
